The Lunchtime Scoop

Your Nutrition & Ingredients Guide

Your Handbook to Our Nutritious Lunches

Included you will find the following information for each of our meals:

- 
- Ingredients list
 - Nutritional breakdown
 - The traffic light labelling system
 - Nutri-nuggets
 - Sourcing information

**Let's check
it out!**

Hot School Meals, an Introduction

The Hot School Meals are underpinned by the Healthy Ireland Nutrition Standards.

The objective of these standards is to include a balance of nutrients so that each meal contains a variety of vegetables, protein, and carbohydrates.

All of which are key in a child's diet, to allow them to thrive in the school environment.

Traffic Light Labelling

The traffic light labelling system is an effective way to help us to determine which foods are more nutritious for us than others. The traffic light label is colour coded and shows that green is low in a particular nutrient, amber means medium and red is high in a nutrient per 100g of that food. This is based on the guidelines provided by the Irish Heart Foundation's Food Shopping Card.

Red means the product is high in a nutrient and you should try to cut down, eat less often or eat smaller amounts.

Amber means medium. If a food contains mostly amber, you can eat it most of the time.

Green means low. The more green lights a label displays, the healthier the food is.

	Sugars	Fat	Saturates	Salt
HIGH per 100g	Over 22.5g	Over 17.5g	Over 5g	Over 1.5g
MEDIUM per 100g	Between 5g and 22.5g	Between 3g and 17.5g	Between 1.5g and 5g	Between 0.3g and 1.5g
LOW per 100g	5g and below	3g and below	1.5g and below	0.3g and below

The amount you eat of a particular food affects how much sugars, fat, saturates and salt you will get from it.

**Irish Heart
Foundation**

Roast Chicken with Mashed Potato, Mixed Vegetables & Gravy

Plenty of visible veg because vegetables in meals are a norm we support.

Low in fat, saturated fat, and sugar.

Typical Values	Per 100g	Per Portion (270g)

- Turkey** Turkey, Salt, Triphosphate, Corn Starch, Carrageenan, Natural Flavour, Preservative: Vinegar

May Contain Gluten

Preservatives & Additives:

Why are they sometimes necessary?

- Our team has worked hard to review all ingredients and remove any preservatives or additives that are not essential. Only those necessary to maintain product quality, freshness, and safety have been retained.
 - Maltodextrin is used to thicken our gravy and bouillon to eliminate a watery consistency.
- Modified maize and potato starch are used so that the texture of the food doesn't change when reheating the food.
- Any stabilisers that are used aid in stabilising the balance between acidity and alkalinity thus allowing for a longer shelf life and less food waste.
- All preservatives and additives used by Glanmore Foods are EFSA (European Food Safety Authority) approved as safe.

The slide features a dark teal background with stylized vegetable illustrations. In the top left is a purple onion with a green sprout. In the top right is a green bell pepper. On the left side is a large orange carrot with a green leaf. In the bottom left are two green broccoli florets. On the right side is a green radish with a pink top and a green leaf. In the bottom right is a pink apple with a green leaf.

Understanding Health & Nutrition Claims

- **Health claims** are statements around the relationship of a food and health and are regulated by the European Food Safety Authority.
- **Nutrition claims** by definition are claims that state, suggest or imply that a food has specific beneficial properties due to its energy or nutrient content. All of which are tightly regulated and can be found on the European Commission's website.
- Below are examples of how we were able to make claims about some of our meals within this document:
 - High in protein = At least 20% of the energy value of the meal is provided by protein.
 - Remember the traffic light system – these operate off approved nutrition claims.

Understanding ‘May Contains’

We include precautionary allergen labelling (‘may contains’ label) to inform customers that although the allergen is not present in the food as an ingredient, certain allergens may be present in the facility that the food has been prepared in. This means that there is a rare chance that allergens may be unintentionally present in a food due to cross-contamination. Although every effort is made to ensure this doesn’t happen, we state whether any of the 14 EU allergens may be contained in our meals so that people with allergies can make safe and informed decisions about the food they choose to eat.

The Lunchtime Scoop

We hope this guide has answered your queries around the ingredients and nutritional breakdown of our hot school lunches. We also hope you enjoyed the nutri-nuggets dotted in between!
